

ANTHEM CORPORATE HEADQUARTERS

The corporate headquarters and computer center of Anthem, Inc. is located at the prestigious 120 Monument Circle address in downtown Indianapolis, Indiana. The structure was built in 1950 as the original J.C. Penney building and was renovated and expanded to compliment the surrounding buildings on Monument Circle. While acknowledging it's historic context, the building provides a distinctive image for Anthem. As part of the building's transformation, RATIO designed a new granite façade, atrium, and fourth floor. Inside the building, four large pyramidal skylights top the four-story atrium, while two second-floor mezzanines and a third-floor seating terrace create a multi-level atrium. The ground floor features a rough granite block fountain and planter which can be seen from virtually all levels of the building.
