

CONSUMER LENDING OPERATIONS CENTER

The Bank One Consumer Lending Operations Center presents a clean, contemporary profile with its two-story brick and glass façade. Designed to consolidate scattered facilities, the interior volume is comprised of two 300-foot long by 120-foot wide wings, flanking a circular central atrium core. A ten-foot wide public street, articulated with arced conference pods, private offices, training rooms, and other hi-wall functions link the wings of the building with the atrium. Bistros incorporate a coffee / vending area, mail station, and whiteboard chatwall with tables and seating. These bistros create a hub with vertical circulation / restroom cores centrally located along each wing. Dramatic use of color and artwork energizes this interactive highway corridor. A full-service cafeteria with seating for 250, company store, gaming arcade, 200-seat town hall, and state-of-the-art data center complement the amenities provided.
