

# BUSEY BANK RENOVATION

As a result of a recent corporate merger, Busey Bank hired RATIO to create a new image through an interior renovation of their existing five story headquarters. Upgraded finishes in customer spaces, reconfigured offices and conference rooms, and coordination with new systems furniture all bring new life to the bank's building. The project features an oculus above which hangs a restored stained glass skylight, circa 1910, salvaged from the bank's original building lobby.
