

# THE CLIFTY INN AT CLIFTY FALLS STATE PARK

The Indiana Department of Natural Resources asked RATIO to prepare a master plan that would allow the Clifty Inn at Clifty Falls State Park to be competitive in the hospitality marketplace in south central Indiana. The master plan included replacing the dilapidated Riverview Inn with a new 40-unit structure and the existing ballroom facility with a two-room 8,000 square foot conference center. The long range plan also included provisions for the development of recreational amenities including tennis courts, a basketball court and horseshoe courts

The new Riverview Inn and conference center were subsequently designed and built. The site development included enhancements to the front entrance, renovated parking facilities and the creation of a wedding terrace and outdoor space for large social functions. All of the new facilities were designed to be complimentary to the existing architecture while evoking a sense of place that is derived from the Park's spectacular natural beauty.
