## Corporate Headquarters Keep Indianapolis Beautiful, Inc. / Indianapolis, IN

RATIO

An affiliate of Keep America Beautiful, KIB's mission is "uniting people to beautify the city, improve its environment, and foster community pride." In keeping with KIB's mission, RATIO designed a soon to be LEED certified headquarters that not only is better for the environment but also allowed the organization to consolidate all of their operations. The building puts KIB in a leadership position regarding environmental commitment in Indianapolis by providing a tangible, civic place where people can experience sustainable development firsthand.

The building's redesign included a green screen, which will ultimately be covered by plant ivy and growth, featuring KIB's sign connected to the façade to greet visitors to the building and serve as a piece of public art. A central atrium captures natural daylight and gives KIB staff views to an open-air courtyard filled with native plants and trees.
