

LOUISVILLE MARRIOTT DOWNTOWN HOTEL

RATIO was the Architect of Record for one of Louisville's largest hotels, the Louisville Marriott Downtown. This 617-room hotel holds a 22,000 sq. ft. grand ballroom and a 9,000 sq. ft. junior ballroom. The hotel features 10 meeting rooms and two board rooms. A full-service three-meal upscale restaurant with exhibition cooking, private dining rooms, and a Tuscan atmosphere are also available for guests. A three-level underground parking facility provides 485 spaces for parking.

The hotel also features a Champions sports bar, Starbucks, spa, pool, and exercise room. The exterior of Champions will incorporate the facades of the 100 year-old Coleman building.

The Louisville Marriott Downtown is connected to the Kentucky Convention Center and the State Parking Garage via pedestrian bridges also designed by RATIO.
