

# SPRINGFIELD COMBINED LABORATORY FACILITY

The Project provides an addition of approximately 100,000 sq. ft. to the existing Springfield Combined Laboratory Facility located at the Southern Illinois University School of Medicine. The School of Medicine addition houses a laboratory animal suite, molecular biology laboratories, tissue culture rooms, training labs, and a comprehensive suite for electron microscopy.

The area for the Illinois Department of Public Health (IDPH) includes laboratories for blood lead testing and virus serology analysis, incorporating a Biosafety Level 3 (BSL 3) suite for the study of more sophisticated organisms. The facility for the Illinois State Police (ISP) Forensic Crime Laboratory provides laboratories and associated office space including ballistics, fingerprinting, and trace analysis.
