

RENOVO ORTHOPAEDIC CENTER

reNovo combines Sport Medicine, Sport Works and F.O.R.C.E. into a single facility to “revive, renew and restore” patients. Sport Medicine includes a single practice physician suite with exam rooms. Sport Works includes therapy space, a gym with weights, treadmills, bikes, nautica equipment, a walking track, basketball goal, and golf net. Occupational therapy, a hydrotherapy pool with an incorporated treadmill, and patient showers are also included. F.O.R.C.E. is a dual practice orthopaedic surgeon’s suite with exam rooms. Adjacent to F.O.R.C.E. is an imaging suite with two radiology rooms.

Located in Intelliplex Park in Shelbyville, Indiana, the 24,970 sq. ft. single story facility was designed with an emphasis on sustainable design. The exterior has incorporated native plants, rain gardens, bioswales and pervious concrete in the parking lot to filter the water collected on site. Wind turbines will help offset electric dependence and provide a tangible visual example of the owner choosing to be a conscientious steward of the environment.
